

GoVision

Great Magnification, Portable Design

HIMS
Lifestyle Innovation

The GoVision offers excellent near and distance magnification with your favorite contrast schemes and lighting controls. The GoVision's portable folding design makes this magnifier great for work, school, or at home.

Portable Read, Write, and Distance Magnifier

The GoVision is a space saving HD video magnifier that combines the best features of a desktop magnifier with portability and connectivity unrivaled by other products. Magnify text, view photos, check food ingredients, do crafts and more. Use Self View mode for personal grooming and Distance Mode to view a whiteboard in class or a presentation at work.

Screen-Width OCR

The GoVision's built-in OCR makes capturing post cards and other small items simple to read. Captured text can be read aloud and can be read in your preferred method.

Versatile Design

The GoVision has a versatile design that allows you to adjust the camera position and screen position to match your reading needs.

High Definition Magnification

Utilizing a 60 frames-per-second camera with full high-definition image makes images appear crisp and clean, and text is easy to read.

Brightness, Color, and Contrast

Adjust LED lights with brightness controls and choose your favorite color scheme to make reading easy on your eyes.
