

BrailleSense 6

GETTING THINGS DONE

You have been asking for a braille notetaker that can keep up in today's classroom.

Say hello to the BrailleSense 6.

Students with the BrailleSense 6 read textbooks, write reports, complete assignments, send emails, share documents with Google Drive, and get their classwork done.

The BrailleSense 6 does all of this better than any other notetaker and is simply the most powerful and future-proof braille device in the world. Period.

Super Fast and Powerful

The BrailleSense 6 is absolutely the most powerful notetaker in the world and it's not even close. Running Android 10 and sporting hardware found in mainstream technology, the BrailleSense 6 is going to continue to work for your students for years to come.

Here's why the BrailleSense 6 is for you

- 32 high-quality braille cells
- Industry best Nemeth and UEB math support
- Industry best support for uncontracted, contracted, UEB, and Nemeth braille translations
- Fully accessible email that supports all common email providers, including yours
- Up-to-date Operating system and industry best hardware under the hood for long-term performance
- Access to apps through Google Play Store
- Create professional documents with a Word Processor designed specifically for notetaker use.
- Easily share content with sighted teachers and peers through plug-and-play USB Type-C connection, found only on the BrailleSense 6.
- Share documents with a special built-in Google Drive app, designed specifically for the BrailleSense 6.

10 out of 10 Guide Dogs agree; the BrailleSense 6 is the best notetaker for your students.

Built for the Classroom

Math

Students can write math and text in the same document easier and faster than with any other notetaker in the world. There are no limits to the number of lines and our math has visual and audio output for each character written. When it comes to math, the BrailleSense 6 is simply the best.

Word Processing

The BrailleSense Word Processor gives your students the ability to work directly with Microsoft Office files, giving teachers the ability to send files directly to the student. No transcribing necessary.

Email

Easily and accessibly send and receive emails with POP 3, IMAP, and Exchange email services. This includes G Mail and all of the common email providers.

Screen Sharing

Students in the classroom can share their screen with teachers or peers through a single USB-C cable. Students at home can share their screen through Zoom, Google Meet, and other popular virtual meeting applications.

File Sharing

Students and teachers can share files easily, quickly, and accessibly with the BrailleSense 6's proprietary Google Drive application. This app is built specifically for notetaker use and removes the barriers and difficulty of file sharing.

Built for the Future

The needs of your students change. Running Android 10 on the latest and most powerful hardware means the BrailleSense 6 will perform better and last longer than any other notetaker.

Specifications

Android 10

The latest OS in a braille notetaker.

8-Core CPU
