

E-bot and E-bot ADV

E-bot and E-bot ADV

The **FIRST** and **ONLY** Portable Reading, Writing and Distance Video Magnifiers with **Totally Wireless iPad Connectivity and Built-in OCR!**

Connect E-bot wirelessly to your iPad™ or Android™ tablet or by USB to a Mac™ or PC to view and interact with your reading, writing or distance image. Use intuitive pinch gestures and on-screen icons or the included remote (E-bot ADV) to change the zoom level, image mode and contrast level, pause and resume OCR playback and more.

Exclusive iPad and Android Compatibility – Totally Wireless

E-bot and E-bot ADV create their own internal Wi-Fi hotspots for connecting wirelessly to tablets without the need for outside network access. Just install the E-bot App on your tablet, then launch it for a quick and automatic connection.

One-touch Stand-alone OCR (E-bot ADV Only)

Use a single touch to OCR the screen image and listen to it read aloud through a built-in speaker or headphones. Activate and pause OCR from the screen of your tablet or by using the remote control included with the E-bot ADV model.

Ultimate Portability and Flexibility

E-bot and E-bot ADV fold compactly to about the size of a shirt box and weigh only 5 lbs making them easy to transport and set up quickly from classroom to classroom or from home to school and back. This one device can be used by individuals with a wide range of vision conditions in many scenarios, making it one of the most flexible low vision products you'll ever own.

Assistive Technology That's 'Cool'

E-bot combines the efficacy of state-of-the-art portable video magnification and OCR text-to-speech with the cool factor of today's most popular tablet devices so even those who have been reluctant to embrace access technologies in the past are more likely to embrace it. After all, assistive technologies don't do any good if students and clients refuse to use them.

E-bot and E-bot ADV

E-bot and E-bot ADV
