

E-bot PRO

E-bot PRO

The *FIRST* iPad Compatible Portable Reading, Writing and Distance Video Magnifier with Robotic Camera Joystick Control and Full-page OCR

E-bot PRO connects wirelessly to your iPad™ or Android™ tablet and lets you use touch-screen gestures to view and adjust image magnification, text and background colors, OCR scan, Distance or Near camera view and more. E-bot PRO creates its own dedicated Wi-Fi hotspot, so you don't need a local area Wi-Fi network. Just install the E-bot App on your tablet, then launch it. E-bot also connects with MAC via USB and Windows PCs via Wi-Fi or USB cable. Display E-bot on a large TV or computer monitor via an HDMI cable. It's one of the most versatile products you'll ever own.

E-bot PRO

Motorized Camera Joystick or Touch-screen Control

Move the camera to read a document or pan across a room using the remote control's joystick or by dragging your finger across your touchscreen. E-bot's motorized camera remembers the reading position when switching between near and distance viewing modes, allowing you to concentrate on the teacher or speaker. Joystick control offers intuitive hand-eye coordination. Also, teachers may use the joystick remote to help students find their place on the board or textbook page.

Full-page OCR and Built-in SD Card Storage

Capture a full page of text then have it read aloud or save it to read later. E-bot PRO can save your OCR scans as either a .JPG or .TXT file so you can transfer it to your Mac or PC.

Portable and Compact

E-bot PRO weighs less than 7 lbs and folds down to a compact size. Its rechargeable battery lasts up to 4 hours of continuous portable use. Set-up and pack-away are quick and easy. Conveniently carry E-bot PRO in its custom backpack case from classroom to classroom, from home to school and back, or on a business trip. E-bot PRO is used by students, rehab clients, employees and individuals with a wide range of vision conditions.
