

SensePlayer OCR

EXPECT MORE

HIMS
Lifestyle Innovation

The SensePlayer OCR is more than your normal media player. Read and play your favorite documents and media using a tactile keyboard that fits comfortably in the palm of your hand.

Access web radio, download books, make high-fidelity recordings, connect and control your mobile device, and so much more.

Introducing the SensePlayer OCR

SensePlayer OCR is an advanced media player, complete with onboard OCR for scanning and reading with no internet connection required. The tactile keys paired with haptic feedback, audio notifications, and speech feedback make using the SensePlayer OCR simple and intuitive.

Innovative Smart Connection

Use your SensePlayer as a Bluetooth keyboard for your smartphone, letting you navigate, stream audio, input text, and so much more, all with the convenience of tactile buttons.

High Fidelity Audio

Record high-quality audio from the dual internal stereo mics, or use a USB-C plug and play recorder. Playback sounds great with the 1.5 watt stereo speakers for enhanced audio.

User Replaceable Battery

The SensePlayer was built for daily use, but if your battery becomes weak simply swap your old battery out for a new one. No need to send it in for repair.

Supports all of your files

Read and play your files including DAISY books, document files, music, video files, audio book files, Podcasts, and both FM and Internet Radio!

Tactile & Audio Feedback

The Tactile Keyboard offers multi-mode buttons and haptic feedback while built in speakers provide audio notifications and speech feedback.

Two Options to Choose From

Not everyone wants to scan and read, so it makes sense the SensePlayer comes with or without OCR. Choose what fits you best, and come to expect more from your media player.

SensePlayer OCR Specifications

Key Specifications

Product Name: SensePlayer OCR

Memory: 64 GB Storage (43GB available to user)
Micro SD card slot supports up to 256GB

Interface: 1 x USB Type-C 2.0, 1 x 4-pole
